

GEN 13 & 14 LIGHTING PANELS

RELIABLE AND CERTIFIED LIGHTING PANELS

Link4
CORPORATION

CS-LIGH-01-0522

DESCRIPTION

The GEN 13 & GEN 14 Lighting panels are UL certified and carry a 1-year warranty. All Link4 lighting panels utilize lighting-specific high quality components that are certified for the heavy loads of commercial growing.

These panels are designed to keep the heat and noise away from the critical components of the controller ensuring proper functionality and protection.

The panel offers inherent safety features. Built-in sensors detect abnormally high temperatures within the panel - shutting down and protecting the panel. The panels are designed with a time delay that lowers the amount of start-up power which protects your equipment and lowers electricity costs.

Robust external panel switches provide additional manual control. Easily switch between "on" or "off" or set to "auto" when doing maintenance or for operation. The large indicator light on the panel allows you to see if the lights are in operation from a distance.

The GEN 13 & GEN 14 lighting panels ensure the comfort that you are getting the proper components and safety features at a reasonable price compared to field installed lighting panels.

CONTROLLER FEATURES

CONTACTOR COUNT- GEN 13	4
CONTACTOR COUNT- GEN 14	8
COOLING FAN BUILT-IN	GEN 14
EXPANDABLE	Yes- Easily daisy-chained
MANUAL CONTROL SWITCHES	Yes- Auto / On / Off
LIGHT STATUS INDICATOR	Yes
STARTUP TIME DELAYS	Yes- Built-in
ENCLOSURE	NEMA 4

EQUIPMENT INTERFACE

HID LIGHTS	Yes- magnetic & electronic ballasts
LED LIGHTS	Yes
CERAMIC METAL HALIDE LIGHTS	Yes
FLUORESCENT LIGHTS	Yes

PRODUCT SPECIFICATIONS

ITEM CODE	DESCRIPTION	DIMENSIONS	WT
970-3001-04	GEN 13 Lighting Panel	16 x 14 x 8 in	38 lbs
970-3001-03	GEN 14 Lighting Panel	24 x 16 x 8 in	55 lbs

GENERAL CONTROLLER INFORMATION

EQUIPMENT TYPE	Lighting panel
PROJECT TYPE	Indoor / Greenhouse / Hydroponics / Vertical
PROJECT COMPLEXITY	Simple to Complex
PROJECT SIZE	Small to Large
