

# Electrical Installation Services

EXPERIENCE - INDUSTRY SPECIFIC

Link4  
CORPORATION

CS-INST-02-22

## EXPERTISE YOU CAN RELY ON

The Link4 Electrical Installation Services division provides a unique opportunity for growers to work directly with Link4 for equipment and electrical installation. Our services will allow you to work through one contractor with 30+ years of industry and installation experience in the CEA (Controlled Environment Agriculture) industry. This will provide you the confidence that your controls and equipment will be connected correctly and properly reducing lost time, frustration and unwarranted costs.

This service is the perfect solution for new installations or when retrofitting established facilities needing to upgrade or expand their application or equipment.

## SERVICES PROVIDED <sup>2</sup>

- Site assessments
- Equipment assessment
- Equipment staging analysis
- Conduit installation
- High and low voltage wiring
- Equipment testing
- Controller programming
- Installation of Link4 and non-Link4 controllers
- Software or Cloud installation and testing <sup>1</sup>
- Detailed quotes
- Facility design and layout

<sup>1</sup> If applicable

<sup>2</sup> Services are currently available in California only

## A DIFFERENCE YOU CAN COUNT ON

You can have the security and confidence that your installation is being performed by experienced installers with years of experience in the controlled environment agricultural industry.

The installation team comes with

- A licensed electrical contractor with over 30 years of experience installing equipment and controls in greenhouse and grow rooms.
- Experience with modbus and bacnet communication protocols.
- Certified installation experience installing other industry controllers and equipment.
- Fully licensed, bonded, and insured certification.
